Swagger
Supported by SMARTBEAR

Phase 2 Travel Agent SaaS API 1.0.0 OAS 3.0

Search APIs (flights, accommodations, activities, trip recommendations), tenant branding, JWT authentication, and multi-tenant booking persistence.

Servers
http://localhost:3000

Authorize

default

- GET /api/flights/search Search flights
- GET /api/accommodations/search Search accommodations
- GET /api/activities/search Search activities
- GET /api/tenants/{domain}/branding Get tenant branding
- GET /api/trips/recommendations Get budget-based trip recommendations
- POST /api/auth/signup Register a new user under a tenant
- POST /api/auth/login Log in and receive a JWT
- POST /api/bookings Create a booking
- GET /api/bookings List my bookings
- GET /api/bookings/{id} Get a booking by ID

Returns the booking only if it belongs to the caller's tenant. Cross-tenant access returns 404 (not 403) to avoid leaking row existence — matches TC-07.

Parameters

Cancel

Name	Description
id * required integer (path)	4

Execute | Clear
